

Command Mobile and Command Mobile Plus

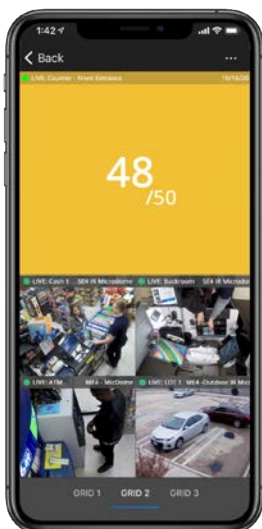

Mobile application for viewing video, transactions and alarms

March Networks' **Command™ Mobile** and **Command Mobile Plus** smartphone apps allow you to view live and recorded video on your mobile device, as well as Transaction Reports from March Networks Searchlight™. The apps work seamlessly with the cameras on your March Networks 8000, 9000, X Series, or RideSafe recorders. Additionally, Command Mobile is compatible with our Command Recording Software. Both apps run on iPhones, iPads, and Android devices, and can be downloaded for free from the App Store or Google Play.

Key Benefits

- ▼ **Situational awareness.** Remotely conduct a “virtual patrol” to assess a situation in advance, prior to taking action, including PTZ control and dewarping of compatible 360° cameras.
- ▼ **Transaction data.** Command Mobile Plus is synched with Searchlight's Transaction Reports, so you can view voids, discounts or any other transactions directly from the app.
- ▼ **Network Address Translation (NAT) Traversal.** Connect directly to your recorders—even those behind a firewall—without having to open additional ports.
- ▼ **Synchronized with Command Enterprise Software.** The app is an extension of Command Client, so it accepts your existing Command login credentials, and gives you access to the folders, views and cameras already set up in Command Enterprise Software.
- ▼ **View live and pre-recorded video.** Search for archived video by time and date, then use the timeline slider to move back and forth in the recorded video.
- ▼ **Operations Audits.** Review snapshots from the cameras at your stores to see what's happening, and discern operational issues like store cleanliness and safety concerns.
- ▼ **Security Audits.** Filter by location and/or alarm type, and view alarm video from the vantage point of one or multiple cameras.

When used with the March Networks Health Compliance Solution, Command Mobile Plus sends you real-time alerts when occupancy limits at a facility are getting close or have been exceeded.

Use your mobile device to access your cameras, transaction data, and alarms and check in on your business from wherever you are.

Investigate transactions integrated with video

Command Mobile Plus is synched with Searchlight for Retail's Transaction Reports, allowing you to:

- Display lists of all store transactions and filter by employee, transaction type, transaction amount, etc.
- Show full receipt with line items
- Analyze video via the easy-to-use interface
- Find instances of internal theft
- Evaluate employee behavior at POS (e.g., how well staff enters multi-item orders)

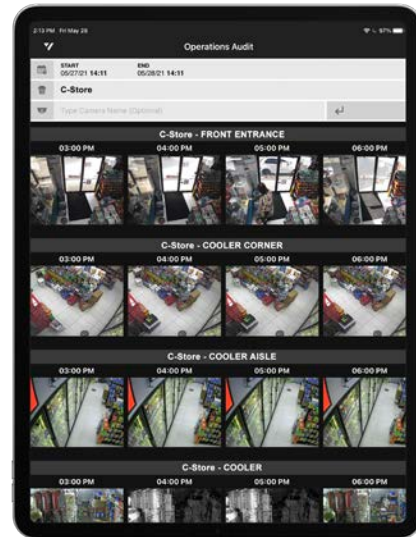

Display lists of all transactions that are important to you. e.g., transactions that are less than \$1

See details of specific transactions, synched with video

Review snapshots of what's happening at one or more of your stores

- Spot check your stores to discern operational issues, such as store cleanliness, employee dress code, and shelf stocking and display.
- Create a filter for your time-window-of-interest (e.g., 07:30 to 09:30) to show snapshots for only certain times of the day, at desired locations.
- Narrow it down to the particular cameras (e.g., Front Line or Vault).
- Click on a thumbnail to play the recorded video.

Which application is right for you?
