For customers who want to monitor a large area from multiple angles and perspectives with a single camera, the **SE2 PTZs** from March Networks® provide uncompromising security, indoors or outdoors. The camera's integrated HDR, 30X zoom lens, P-Iris, and 2MP resolution guarantee superior image quality, regardless of lighting conditions. Choose from the flush mount indoor model, or the outdoor pendant mount equipped with 1.5-inch NPT, which is protected by a weather-proof (IP66), vandal-resistant (IK10) enclosure.

Key Benefits

- ▶ **30X zoom lens.** Get a wide angle view of a large area with no distortion, and zoom in on distant objects, while maintaining clarity.
- ▶ **Built-in auto tracking.** The camera detects motion and tracks a person or object—automatically panning, tilting and zooming—to keep the image centered and in-focus.
- ▶ **High Dynamic Range (HDR).** The camera blends the best parts of several separate exposures together to combine the most focused, well-lit, and colorful parts of the scene.
- ▶ **Image stabilization.** Reduces vibration and blurring, especially when the camera is zoomed all the way in, or is installed up high or in a windy area.
- ▶ **Power over Ethernet.** Combining PoE+ with AC or DC guarantees zero downtime; if power goes out, the camera switches to PoE+ with no interruption.
- ▶ **Save money on storage and bandwidth.** When the camera is in its home position, its low bit rate (LBR) setting reduces storage and bandwidth usage by 50% or more in most applications; streams can drop below 2Mbps at 2MP (15 fps).
